

The third CO5BOLD workshop

Napoli, April 11-13, 2016

editors: T. Straus, M. Marconi and J.M. Alcalà

TABLE OF CONTENTS

| | |
|---|----|
| <i>Index</i> | 5 |
| <i>Foreword</i> | 7 |
| <i>List of Participants</i> | 10 |
| Session 1: Development of the CO5BOLD code | |
| Bernd Freytag <i>Boundary conditions in CO5BOLD</i> | 12 |
| Matthias Steffen <i>Radiation transport in CO5BOLD</i> | 22 |
| Oskar Steiner et al. <i>CO5BOLD for MHD: progresses and deficiencies</i> | 37 |
| Session 2: Solar physics with CO5BOLD | |
| Elisabetta Caffau et al. <i>Investigation of the solar centre-to-limb variation of oxygen and lithium spectral features</i> | 45 |
| Gangadharan Vigeesh et al. <i>On the effect of vorticity on the propagation of internal gravity waves</i> | 54 |
| Session 3: Stellar physics with CO5BOLD | |
| Gohar Harutyunyan et al. <i>3D non-LTE corrections for the ${}^6\text{Li}/{}^7\text{Li}$ isotopic ratio in solar-type stars</i> | 61 |
| Alessandro Mott et al. <i>Lithium in the active sub-giant HD123351:</i> | 68 |

| | |
|---|-----|
| Dainius Prakashavičius et al. <i>The influence of convection on OH UV line formation in the atmosphere of the metal-poor red giant HD 122563</i> | 77 |
| Andy J. Gallagher et al. <i>Enhanced methods for computing spectra from CO5BOLD models using LINFOR3D</i> | 82 |
| Piercarlo Bonifacio et al. <i>Using CO5BOLD models to predict the effects of granulation on colours</i> | 90 |
| Jonas Klevas et al. <i>3D hydrodynamical CO5BOLD simulations of a chromosphere of a red giant</i> | 100 |
| Pier-Emmanuel Tremblay et al. <i>Convective overshoot and metal accretion onto white dwarfs</i> | 104 |
| Mia Sloth Lundkvist <i>Asteroseismology and CO5BOLD</i> | 112 |
