

The Scientific Legacy of Guido Horn d'Arturo

Catania, November 9-10 2018

editors: R. Spiga, F. Bonoli, G. Pareschi, G. Trinchieri

TABLE OF CONTENTS

<i>Index</i>	445
<i>Foreword</i>	446
F. Bonoli <i>Guido Horn d'Arturo and the first multi-mirror telescopes: 1932-1952</i>	448
R. Ragazzoni <i>The fine and transformational optics of Guido Horn d'Arturo</i>	468
F. Fernandez-Barral and F. Ferrini <i>Cherenkov Telescope Array: 120 telescopes and 6500 mirror segments to explore the very high-energy Universe</i>	473
S. Scuderi <i>The ASTRI project</i>	484
O. Catalano <i>Cherenkov light for gamma astronomy and not only</i>	492
L. Zarantonello <i>The eventful life of Guido Horn d'Arturo in a comic book</i>	500
S. Sinicropi <i>Guido Horn d'Arturo, the world, the passions and the interests of a contemporary humanist</i>	512
C. Quareni <i>Guido Horn d'arturo, the Jewish roots of an Italian astronomer</i>	522
M. Gargano <i>The Astri of Horn: the scientific legacy of astronomer who invented the future</i>	529
G. Pareschi <i>From the Horn d'Arturo segmented telescope to the ASTRI-HORN end-to-end system: cutting-edge technologies and industrial involvement in astronomical instrumentation</i>	535
R. Spiga(curated by), G. Giobbi(translated by) <i>Guido Horn d'Arturo: selected papers</i>	540
