

**EWASS 2019: Special Session 22 Stellar multiplicity in the  
Gaia era: where do we stand?**

*Lyon, June 25, 2019*

*editors: T. Merle and M. Van der Swaelmen*

**TABLE OF CONTENTS**

<i>Index</i>	310
<i>Foreword</i>	312
<b>Looking for binaries with Gaia and large surveys</b>	
D. Pourbaix <i>Binaries in Gaia perspective</i>	318
G. Traven, K. Čotar, T. Merle, M. Van der Swaelmen, Y.-S. Ting and the GALAH team <i>Machine learning techniques meet binaries</i>	327
P. Kervella, F. Arenou, F. Mignard, A. Gallenne, N. R. Evans, and F. Thévenin <i>Binarity from Gaia DR2 and Hipparcos proper motion anomaly and common proper motion</i>	340
<b>Properties of binaries</b>	
M. Moe <i>Multiplicity Statistics and Properties across the HR Diagram</i>	347
H.M.J. Boffin and D. Pourbaix <i>The mass-ratio distribution of spectroscopic binaries along the main sequence</i>	359
A. Rainot, M. Reggiani, H. Sana, C. A. Gomez-Gonzalez, O. Absil, V. Christiaens, P. Delorme, L. Almeida, S. Caballero-Nieves, J. De Ridder, K. Kratter, S. Lacour, JB. Le Bouquin, L. Pueyo and H. Zinnecker <i>Towards constraints on massive galactic stars using VLT/SPHERE with high-contrast imaging</i>	366
T. Merle, M. Van der Swaelmen, S. Van Eck and A. Jorissen <i>Properties of single-line spectroscopic binaries detected in the Gaia-ESO Survey</i>	374

	311
E. Foxell, J. McCormac and D. Pollacco <i>Characterising EBLMs from SuperWASP-North</i>	382
<b>Formation and evolution of stellar binaries</b>	
C. Clarke <i>The theory of multiple star formation in the Gaia era</i>	386
A. Jorissen <i>Impact of binaries on stellar evolution in the Gaia era</i>	395
A. Escorza, A. Jorissen and H. M. J. Boffin <i>The formation of barium stars as constrained by Gaia distances</i>	407
A. Lamberts <i>White dwarf binaries in the Milky Way</i>	413
<b>Posters</b>	
O. Malkov and D. Chulkov <i>Orbital binaries in Gaia: parallaxes and masses</i>	420
T. Merle, S. Van Eck, K. Pollard, M. Van der Swaelmen, A. Jorissen, D. Pourbaix, R. Smiljanic and T. Zwitter <i>A very rare hierarchical SB4 system detected in the Gaia-ESO Survey?</i>	424
