

# **1<sup>st</sup> Italian Space Agency workshop on Astrobiology: the Italian roadmap for the next decade**

*ASI - Rome, October, 2020*

## **Scientific Organizing Committee**

Barbara Negri - Agenzia Spaziale Italiana,  
Eleonora Ammannito - Agenzia Spaziale Italiana,  
Daniela Billi - Università di Roma Tor Vergata,  
John Robert Brucato - Istituto Nazionale di Astrofisica,  
Fabrizio Capaccioni - Istituto Nazionale di Astrofisica,  
Barbara Cavalazzi - Università di Bologna,  
Marino Crisconio - Agenzia Spaziale Italiana,  
Ernesto Di Mauro - Università di Roma La Sapienza,  
Marco Moracci - Università di Napoli Federico II,  
Raffaele Mugnuolo - Agenzia Spaziale Italiana,  
Silvano Onofri - Università della Tuscia,  
Claudia Pacelli - Agenzia Spaziale Italiana,  
Raffaele Saladino - Università della Tuscia,  
Giovanni Vladilo - Istituto Nazionale di Astrofisica

## **Local Organizing Committee**

Bruno Mattia Bizzarri - Università della Tuscia,  
Paola Gentilini - Agenzia Spaziale Italiana,  
Andrea Strazzulli - Università di Napoli Federico II

**Institutional Endorsement**

Agenzia Spaziale Italiana

Società Italiana di Astrobiologia

European Astrobiology Network association

Istituto Astrobiologico Italiano

Università di Bologna

Università della Tuscia

Università di Napoli Federico II

## FOREWORD

The 1<sup>st</sup> Italian Space Agency workshop on Astrobiology was held at the Italian Space Agency in Rome on October 27<sup>th</sup> – 29<sup>th</sup> 2020.

The workshop was organized with the intent to map the current capabilities of the Italian scientific community in the Astrobiology field. Indeed, the workshop has been the first step of a process that will lead to the definition of a national long-term roadmap to optimize the Italian contribution to the international activities and programs in the next decade of research, exploration and discoveries in the field of Astrobiology. Astrobiology is by definition a multidisciplinary field and the intention is to create a common platform for the scientific communities working on different topics in order to create synergies and identify future opportunities for joint activities. To this end, the workshop hosted contributions by Italian scientist from the following areas:

- Italian Space Agency activities relevant for Astrobiology
- Extremophiles and extreme environments
- Prebiotic chemistry
- Experiments in Low Earth Orbit (LEO)
- Astrobiology beyond the Solar System
- Solar System sciences & Exploration
- Extraterrestrial and analog materials

The final goal of the workshop has been to build an interdisciplinary Italian community of scientists prepared to enter a new era of discoveries and to be ready for the future challenges in the space research and exploration.

In this volume there is a collection of topics that have been presented and discussed during the workshop.

B. Negri, E. Ammannito, C. Pacelli
