

## RRLCEP2022: Large-scale surveys as bridges between spectroscopy and photometry

editors: Poretti, E., Monelli, M., Fiorentino G.

### TABLE OF CONTENTS

<i>Index</i>	7
<i>Foreword</i>	9
<i>A brief History of the RRL/CEP conference series</i>	13
Marconi et al. <i>Latest advances in theoretical models for classical pulsators</i>	15
Chiappini <i>Mapping the Milky Way with large spectroscopic surveys in the Gaia era</i>	24
Battaglia et al. <i>The WEAVE Galactic Archaeology surveys and RR Lyrae variable stars within</i>	32
Nardetto <i>From the physics of classical pulsators to the distance scale using high resolution spectroscopy and interferometry</i>	40
Netzel <i>Blazhko effect and the Petersen diagram</i>	48
Catelan <i>Stellar Variability in Ground-Based Photometric Surveys: An Overview</i>	56
Plachy <i>Recent advances in the photometric investigation of classical pulsators with the Kepler/K2 and TESS missions</i>	72
Braga et al. <i>A multifaceted overlook of the galactic Halo through RR Lyrae</i>	80
Martinez-Vazquez <i>Pulsating stars in Local Group dwarf galaxies</i>	88

8

Skowron

*Pulsating stars in the Magellanic Clouds, RRLCep2022* 100

Clementini

*Classical Pulsators in Gaia DR3* 107

Anderson

*Young stellar distance indicators and the extragalactic distance scale* 115

Madore and Freedman

*Population II Distance Indicators. RR Lyrae Variables, TRGB Stars and JAGB/Carbon Stars* 123

*RRL2022CEP Conference Picture* 131
