

Various Innovative Technological Experiences (VITE II)

Transforming Science and Society with XR, AI, and Creative Communication

editors: L. Daricello, L. Leonardi, F. D'Alessio

TABLE OF CONTENTS

<i>Index</i>	7
<i>Foreword</i>	10
Vitali et al. <i>MIRTA: an Interactive Map for the Technological Resources in Astrophysics</i>	13
Innocenti <i>University Research and Teaching in Virtual Reality: The LabVR UNISI Experience</i>	17
Gomes Araujo et al. <i>Extended Reality as an enabling technology to Advanced Air Mobility. Project experiences of the Virtual Reality and Simulation Laboratory at the University of Bologna</i>	22
Guidetti et al. <i>Sorvegliati Spaziali in the service of Planetary Defense. Enhancing communication with augmented reality</i>	27
Guidazzoli et al. <i>Multiplying Research Outcomes through the Application of AI Tools to Cultural Heritage</i>	33
Magrini et al. <i>Art and Science: A Mutual Exchange The experience of the Signals and Images Laboratory of the ISTI-CNR</i>	38
Carboni et al. <i>Towards an inclusive future: technologies and methods for Active and Healthy Ageing and Developmental Disorders</i>	44
De Luca et al. <i>VFX in Blender for scientific visualisation and storytelling</i>	50

Di Carlo et al. <i>IMAGO: an Augmented Reality Project to support scientific outreach using dedicated telescopes</i>	57
Daricello et al. <i>Discover the secrets of the highest-energy Universe: The CTAO Virtual Tour</i>	70
Ambrosio <i>Exploration of the Moon between communication and science. A virtual reality experience for public engagement in astronomy and space science</i>	76
Leonardi et al. <i>Communicating the Ariel Space Mission. Brand identity, social media, and augmented reality</i>	81
Menna et al. <i>Development of a virtual tour for the Astronomy Science Museum at INAF OAR</i>	87
Leonardi et al. <i>The metaverse to interact with stars. A virtual exhibition at Palazzo Esposizioni Roma</i>	92
Mantovani et al. <i>Communicating science in the digital era: the example of the virtual tours and the Solar System Console of the "Time Machine" exhibition</i>	96
D'Alessio et al. <i>The Holotheater at OAR: A new instrument for outreach in astronomy</i>	101
Mignone et al. <i>Play INAF for schools: Coding and educational robotics training for teachers</i>	107
Leonardi et al. <i>The "wow effect" is out-of-date: Developing digital skills in the citizens of the future</i>	113
Rodelli <i>Towards other worlds: Practicing exogeography in primary schools</i>	120
Ginolfi et al. <i>herakoi: a sonification experiment for astronomical data</i>	126
Di Giacomo et al. <i>The Universe as you never sensed it. The project of a multisensory planetarium in order to discover the beauty of the sky</i>	131
Di Giacomo et al. <i>From virtual present to real future. New technology to describe the future of high-energy astronomy. An analysis of the effectiveness of planetariums to describe the characteristics of the CTAO project</i>	137

Liguori et al.	
<i>Art as an interpretation of scientific data</i>	143
Sandri et al.	
<i>Astro Arcade: the videogames in '80s style at the Time Machine exhibition</i>	148
Angelinelli et al.	
<i>ArbörIA: An open-data-based urban tree inventory tree solution improved by AI optimization</i>	153
